

LOCATAPRO Modules

Increase the functionality of the
most comprehensive housing
system on the market

**16 ADD-ON
MODULES
AVAILABLE**

Locata Pro Modules are a collection of individual component add-ons that plug in to your Locata Pro housing system to increase its functionality.

The Locata Pro Modules

You can add individual modules or a number of them simultaneously to start building an increasingly sophisticated digital-by-default Housing Options system at a pace that suits your local needs and budget.

The Locata Pro Modules are offered as a shopping list of component add-ons that allows you to select the specific increased functionality that meets your particular requirements as you add services to your Locata Pro housing system.

Future-proofed services

No housing service ever stands still. Schemes get bigger, local policies change and throughout it all, everyone is constantly searching for efficiencies and cost savings. Locata Pro Modules allow you to future-proof your housing system by providing complete flexibility in the way you develop your services.

Modules and Enhancements can be added cost-effectively to your Locata Pro service in line with your local needs. You decide the direction in which you wish to develop your services at a speed that suits both your team and your customers.

Stand-alone and Integrated Modules

Locata Pro Modules can be deployed as plug-in component packages that are fully integrated with the Locata Pro housing system. However, there are also a number of Modules that can stand-alone and deliver services separately from any other Locata system.

Integrated Modules

- ✓ Sits alongside the Locata systems you already have
- ✓ Complements and extends the Locata Pro System
- ✓ Additional support for your team dealing with customers
- ✓ Delivers a digital-by-default programme
- ✓ Saves on resources and costs.

Stand-alone Modules

- ✓ Deployed separately
- ✓ Can be integrated with Locata systems at a later date
- ✓ Connects with other existing systems
- ✓ Tailored to support your particular needs
- ✓ Fast deployment allowing quick improvement to services
- ✓ Drives efficiencies and reduces costs.

A Modular Approach

Locata has developed a modular approach for the delivery of its systems in order to offer highly flexible and cost effective development options.

Many of our customers start with an entry level set of modules called Locata Pro. This is designed to be the core of your housing register system and covers online customer applications, management of the ongoing registrations and a bidding and lettings process that your customers can interact with.

Individual modules can then be added that integrate seamlessly with your existing Locata system to provide your staff and customers with more specific and upgraded services.

Locata Pro's modular design also allows for extremely competitive pricing as existing systems are easily augmented by simply plugging in a new module or enhancement.

We offer 16 Modules as add-ons to the Locata Pro system. They can be configured to deliver a housing options system that reflects your policy and local housing needs helping to save money, resources and time.
