MODULES

LOCATA
Housing Services

Add to the functionality of the most comprehensive and flexible housing system available on the market

CLOUD HOSTED

www.locatahousingservices.org.uk

LOCATAPRO Modules are a collection of individual systems and components that add-on or plug-in to your **LOCATAPRO** housing system to increase its functionality.

For example: One local authority has seamlessly integrated its Lettings Systems with HPA2, the Housing Related Support module and the Social Lettings Agency system.

SOCIAL LETTING AGENCY PRIVATE SECTOR LETTING

You can add individual modules or several of them simultaneously to start building an increasingly sophisticated digital-by-default Housing Options system at a pace that suits your local needs and budget.

The **LOCATAPRO** Modules are offered as a shopping list of component add-ons that allows selection of the specific increased functionality that meets your individual requirements as you add services to your **LOCATAPRO** housing system.

FUTURE PROOFED
SERVICES

No housing service ever stands still. The Homelessness Reduction Act proved that. Schemes grow or shrink as local policies change, but better services are always required. Throughout it all, everyone is constantly searching for efficiencies and cost savings. LOCATAPRO Modules allow you to future-proof your housing system by providing complete flexibility in the way you develop your services.

Modules and enhancements can be added cost-effectively to your **LOCATAPRO** service in line with your local needs. You decide the direction in which you wish to develop your services at a speed that suits both your team and your customers.

STAND–ALONE & INTEGRATED MODULES

MODULES

LOCATAPRO Modules can be deployed as plug-in component packages that are fully integrated with the **LOCATAPRO** housing system. However, there are also several modules that can stand-alone and deliver services separately from any other Locata system.

Integrated Modules

- Sit side-by-side with the Locata systems you already have
- Complements and extends the LOCATAPRO system
- Additional support for your team dealing with customers
- Delivers a GDS digital-by-default programming
- Saves on resources and costs.

Stand-alone Modules

- Are deployed separately
- Can be integrated with Locata systems at a later date
- Connects with other existing systems
- Tailored to support your individual needs
- Fast deployment allowing quick improvement to services
- Drives efficiencies and reduces costs

A MODULAR
APPROACH

Locata has developed a modular approach for the delivery of its systems in order to offer highly flexible and cost-effective development options. We have done the same for our enhancements packages as well.

Many of our customers begin with the starter system called LOCATAPRO. This is designed to be the core of your housing register system and covers online customer applications, management of the ongoing registrations and a bidding, offering and lettings process that your customers can interact with.

Individual modules can then be added that integrate seamlessly with your existing Locata system to provide your staff and customers with more specific and upgraded services.

LOCATAPRO's modular design also allows for extremely competitive pricing as existing systems are easily augmented by simply plugging in a new module or enhancement.
